◊ Legal Disclaimers

Apple Intelligence: Available in beta. Some features may not be available in all regions or languages. For feature and language availability and system requirements, see support.apple.com/121115.

Crash Detection: iPhone 14 and later can detect a severe car crash and call for help. Requires a cellular connection or Wi-Fi calling.

Display Size: The display has rounded corners. When measured as a rectangle, the screen is 6.27 inches (iPhone 17) or 6.06 inches (iPhone 17e, iPhone 16e) diagonally. Actual viewable area is less.

Power and Battery: All battery claims depend on network configuration and many other factors; actual results will vary. Battery has limited recharge cycles and may eventually need to be replaced. Battery life and charge cycles vary by use and settings. See apple.com/batteries and apple.com/iphone/battery.html for more information.

Roadside Assistance, Emergency SOS, and Messages via Satellite: Satellite features are included for free for two years with the activation of any iPhone 14 or later model. Connection and response times vary by location, site connectivity, and other factors. Some satellite features are supported by satellite connectivity on supported carriers. SMS message rates may apply. Satellite connectivity is provided by Globalstar and its affiliates. See support.apple.com/kb/HT213885 for more information.

Scratch Resistance: 3x better scratch resistance of Ceramic Shield 2 is compared with previous-generation iPhone.
