

Testimonials:

1. **“If not for our Dream Sock, I may never have known her oxygen was low”**

“[At] night the Dream Sock Base Station woke me up telling me to check my baby. Her oxygen had dropped super low...we rushed her to the ER. If not for our Dream Sock, I may never have known her oxygen was low. I am so grateful to have had this device to assist in my babies' health journey.”

– Nicole B.

2. **“I love being able to open the Owlet Dream App to check his heart rate and oxygen when I am feeling anxious.”**

“As a first-time mom with Postpartum Anxiety, knowing our Owlet Dream Sock will notify me if my son needs me gives me peace of mind and the ability to sleep between nightly feeds. I also love being able to open the Owlet Dream App to check his heart rate and oxygen when I'm feeling anxious in the middle of the night.”

– Kylee W.

3. **“After being in the ICU... we compared our Dream Sock to the hospital O2 monitor and it was very accurate.”**

“After being in the ICU with the flu at 6 weeks old, we got our Dream Sock to keep an eye on our baby and to make sure she was getting the oxygen she needed. We compared it to the hospital O2 monitor and it was very accurate! We love our Dream Sock and would recommend it to everyone.”
